

## Fabulous Illinois Watch Co. data base & search feature

This fabulous horological tool, the first such tool created by Chapter 149 member Dr Russ Snyder, covers all aspects of Illinois watches. You can search by serial number your Illinois watch grade, size, jewellery, production, etc., etc and includes most photos of Illinois watch movements. This innovative tool (copy righted property of Chapter 149) supplements the Ehrhardt-Meggars "blue book" but provides new information for a fast, full proof check. This Ill CD has sold around the world for nearly a decade and is available exclusively from Chapter 149 for a \$20.00 (post paid) donation to advance our chapter's research.
